

C4. Compiler

→ Tokens are sorted in tk, ival, id

Key data Structures:

- 1- Tokens (tk, ival, id)
→ store lexical information
- 2- Symbol Table (sym[])
→ Holds variable / function
- 3- Instruction memory (e[])
→ Stores compiled bytecode
- 4- Stack (sp[])
→ used for function calls, local variables
- 5- Heap (data[])
→ Stores global variables and dynamically allocated memory
